

IQ-BATT-5

GPS needs sky. Your assets don't.

Pull a trailer into a shop, stack a container under a roof, park a lift inside for the winter, and a GPS-only tracker goes quiet. **IQ-BATT-5 reads the Wi-Fi around it** and works out where it is, so the asset still reports. No power, no wiring, no install appointment.

Wi-Fi

INDOOR POSITIONING, NO GATEWAY

IP69K

SEALED FOR WASHDOWN, NOT JUST WEATHER

-40°C to +75°C

OPERATING TEMPERATURE RANGE

2 x AA lithium

REPLACEABLE IN THE FIELD

— TODAY'S REALITIES IN THE YARD · FIND EVERY ASSET

Assets move indoors and go quiet. A trailer pulled into a shop stops reporting, and nobody can tell it's still there.

The low-value assets never got tracked. Bins, pallets, signs and dumpsters go missing too, and the replacements add up quietly.

Washdown bays and February are hard on hardware. High-pressure washing and deep cold ask more of a housing than weatherproofing alone.

One tracker. Six reasons fleets choose IQ-BATT-5.

THE AIRIQ SOLUTION

It finds it indoors

Wi-Fi positioning takes over where GPS gives up, so an asset parked inside still reports.

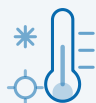

One map, one account

Trailers, equipment and trucks all report into AirIQ Fleet™, on the same map, in the same app.

Sealed for washdown

IP68 and IP69K. Pressure washing is a cleaning job, not the end of the tracker.

Rated to -40°C

Runs from -40°C to +75°C, which covers a prairie winter and a sun-baked container roof.

Mount it and walk away

No wiring, no power, no install appointment. Extra-strong magnet mounts are an accessory.

Tampering isn't silent

A light sensor catches the housing opening. The accelerometer reads movement, tilt and rotation.

NEXT STEP

Tag the assets that keep disappearing with the IQ-BATT-5

ALSO INCLUDES · WI-FI BSSID POSITIONING INDOORS · GNSS, CONCURRENT GPS AND GLONASS · UNDER 3 M POSITION ACCURACY · LTE-M AND NB-IOT · GEOFENCING AND ZONE IN/OUT ALERTS · 256 RECORDS HELD ONBOARD OUT OF COVERAGE · BLE 5.2 · MONTH-TO-MONTH, NO CONTRACT
